

Stafford DNA

Stafford DNA Project

The Stafford DNA Project is sponsored by the Stafford Society. We encourage all males bearing the Stafford surname to submit a sample. It is an easy and painless process to give a DNA sample. A sterile swab is mailed to you which you rub against the inside of your cheek. You then mail the sample back. That's all there is to it.

We recommend that you have the male 37 marker test if you can afford it. It is a better value than the 12 marker test and gives a greater ability to understand potential matches. The 67 marker test is an excellent tool to fine tune our understanding of how various sons are descended from a common ancestor.

To participate in the project and receive our project discount go to:
www.familytreedna.com/surname_join.asp?code=H70878&special=True .

The project's home page is at: <http://www.worldfamilies.net/surnames/stafford/> .

If you have any questions or would like a more detailed explanation of DNA and the project please email our project administrator:

Randall Stafford (webmaster@staffordsociety.org This e-mail address is being protected from spam bots, you need JavaScript enabled to view it) .

Other DNA links:

The National Geographic's Genographic Project is affiliated with Family Tree DNA so their results are interchangeable with ours.

Their website is: <https://www3.nationalgeographic.com/genographic/index.html> .

This site has a wealth of information about DNA, how their project works and what its value is to you and to science.
